On India's 75th Independence Day, Prime Minister Narendra Modi said: "The goal of Amrit Kaal is to ascend to new heights of prosperity for India and the citizens of India." Azadi Ka Amrit Mahotsav is an initiative of the Government of India to celebrate and commemorate 75 years of independence and the glorious history of its people, culture and achievements. Our vision is to contribute our little bit towards making Amrit Kaal which we have entered to until India@100 is a superpower by 2047. A golden era has begun and we are all racing towards making India - 5 trillion dollar economy. The Best of India . Biz is a series of events which are small steps in this direction.

India is adding 1 trillion dollars every three years. In terms of the nominal GDP, it climbed up from the 10th position in 2014 to the 5th position in 2022. Going by these trends, India is poised to become a 5 trillion-dollar economy soon. India has the world's largest youth population, at around 356 million. At 64 per cent, the high percentage of India's working population not only contributes to growth in GDP and per capita income, but also represent a large customer base for companies to target & thrive.

Around 40 per cent of India's installed electricity capacity already comes from non-fossil fuel sources. This switch to renewable energy like solar or CNG, besides being clean, also lowers the costs for individuals and businesses and reduces the country's reliance on imports. India has a voracious appetite for technology. In the manufacturing and financial sectors, the technology adoption rate has increased. This improved productivity, while reducing production costs and improving quality. These factors drove profitability and, therefore, increased investments in innovation.
